AIR LINES

TM UNIFORM AND LINEN CATALOGUE

I think Flight Attendants always look so glamorous in their uniforms. Each airline has different styles of uniform that makes their own company unique. Most uniforms have a variety of options: different jacket styles (double or single breasted), pants, skirts, short or long sleeved shirts and blouses, dress, ties, scarves, and other accessories. Within these options, Flight Attendants are free to select what fits and looks best. If you have been on an airplane, you will notice that some airlines have different uniforms to change into for different timing. One for walking through the terminal, one for boarding and deplaning, and one for serving! Here at TM Fashion Factory & Hotel Supplies, you'll find all what you might dream of.

APRON

TM UNIFORM AND LINEN CATALOGUE

Today, aprons have taken on a whole new role, and that is the work-wear-apron. Aprons are used today as part of the necessary tools that professional chefs, cooks, and waiters must wear on a daily basis. If you ask any one of the above mentioned, how important the apron is to their jobs, they would probably say they can't work without it. It is very important to make sure our crews have the best work wear to begin with, but there are many other reasons as well.

The need for wearing an apron is important during kitchen work, Restaurant servers, house work, or casino work, and has been well documented. Here at TM Fashion Factory & Hotel Supplies we understand your needs, so we cater to those that are not only looking for design, colors, and fit, but quality and representation as well. This is very important to us; we take your business serious. In doing so, we want to outline some important areas that shouldn't be overlooked when making a decision about the types and styles of aprons to choose.

SECURITY

TM UNIFORM AND LINEN CATALOGUE

If you are a security company, or a security manager and you want to make an impression on your clients, then dress your security professionals with uniforms that will allow them to stand out and be seen. It is very important to have your security professionals dressed for the job, meaning, they need to look the part.

Most companies that provide business or corporate security do a pretty good job at this. The reason being they understand the importance of "presentation equals representation" how you look represents your company. The other thing is, bottom line, you just want to look professional.

WINTER WEAR

TM UNIFORM AND LINEN CATALOGUE

Winter wear is a category that includes any article of clothing that can be worn outdoors and in the cold weather. This usually refers specifically to jackets, coats, pullover, sweaters, hats, trousers, and scarves. Clothing for the outdoor needs to be more durable than regular, everyday clothing that will probably be worn more indoors. In the past outerwear has been bulky and functional rather than stylish and chic - but no more! These days outerwear is some of the most comfortable, stylish and practical clothing on the market. As the name suggests, outerwear is the clothing you wear on top off all your other clothing. This means that it will be the clothing that you will be seen in the most and for this reason it should be stylish and fit with your personality too. There is really no excuse to have ill-fitted or boring outerwear, thanks to brands like Port Authority and Nike using fashion designers to help them design their outerwear.
